EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason Burgmaier on 4/7/10.

2. The application has been amended as follows:

In the Claims:

3. In claim 17, line 7 after "such that" insert - - the openings extend through the lower surface and also - -.

4. Claims 21 and 24 are rejoined as claim 17 is generic to each Species. The previous Species restriction requirements are withdrawn.

5. This application is in condition for allowance except for the presence of claim 26 directed to an invention non-elected without traverse. Accordingly, claim 26 has been cancelled.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance:

The amendment to claim 17 above, and the amendment to the claims in the RCE filed 3/24/10 are supported by Figure 3. Cutting balloon catheters including a cutting blade and openings extending through the lower surface of the blade were known as shown by Vigil et al.

Art Unit: 1791

(U.S. Patent 5,320,634). It was further known in additional arts of embedding a structure within a joining member to provide circular openings in the structure to form a mechanical interlock between the structure and joining member as shown by Oehmig (U.S. Patent 3,098,266), Gold (U.S. Patent 4,987,699), etc. However, the prior art of record fails to teach or suggest a method for manufacturing a cutting balloon catheter including a metallic blade having the interlocking structure of Figure 3, i.e. the cutting blade having a cutting surface and a base having a lower surface, the base including an interlocking structure defined by a plurality of openings formed in the metallic cutting blade along the base such that the openings extend through the lower surface *and also* an imaginary plane perpendicular to the longitudinal axis which passes through one of the plurality of the openings also passes through material of the base located between the opening and the lower surface of the base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **(571)272-1216**. The examiner can normally be reached on M-F (7:15 AM - 3:45 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on (571) 272-1226. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
